

Where the Conversion Leaks Are

example.com · CRO Recommendations · August 2026

The homepage lacks a clear value proposition and trust signals, and the site's technical foundation (missing viewport, metadata, security headers) undermines both conversion and trust. The single most valuable conversion mechanism is the primary call-to-action, which is currently generic ('Learn more') and unsupported by any social proof or clarity about the offering, bleeding value from every visit.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Missing security headers All six standard security headers are missing, leaving the site vulnerable to common attacks.	Medium	Medium	6/10
2	Missing value proposition The homepage headline is a placeholder, so visitors have no idea what is offered or why it matters.	High	Low	5/10
3	No trust signals The homepage lacks reviews, guarantees, or security badges, so first-time visitors have no reason to trust...	High	Medium	5/10
4	Generic CTA without context The only call-to-action 'Learn more' gives no indication of what will be learned or what action follows.	Medium	Low	5/10
5	Weak page metadata Search and social previews are degraded due to missing or poor metadata, reducing organic traffic.	Medium	Medium	5/10
6	Missing trust signals above the fold The homepage shows no sign of returns policy, guarantee, reviews, security badge, so a first-time visitor has...	High	Medium	5/10
7	No responsive viewport Without a viewport meta tag, mobile users see a scaled-down desktop layout, making the site unusable on...	Urgent	Medium	4/10
8	No responsive viewport declared Without a viewport meta tag mobile browsers render the desktop layout scaled down, making every tap target...	Urgent	Medium	4/10
9	Missing trust signals above fold The homepage shows no returns policy, guarantee, reviews, or security badge, increasing perceived risk.	High	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
